

\$NFTzToken what you need to know

\$NFTzToken serves as the utility token for two platforms, NFTz.me and InterSocial App, both operating on the DeSo blockchain.

NFTz.me (<https://nftz.me>)

A social NFT marketplace on the DeSo blockchain, supporting 3D collectibles, audio, VR, and live auction. It aims to simplify NFT buying and selling, closely integrated with DeSo for social interactions and NFT minting. Comes with advanced NFT features.

Our features:

- Easy NFT minting for DeSo blockchain
- Stats, reporting and sales information about DeSo NFTs
- Profile zones with all your NFTs and stats
- Live auctions for your NFT
- Support and stats for NFT collections
- 3D gallery to show off your NFTs
- Pay NFTs with \$Focus
- Get daily rewards using NFTz

About Deso NFTs and NFTz

Deso NFTs are unique in crypto since they come with flexible options and on chain royalties and everything on the same chain. See this video and our role as flagship NFT marketplace:

 [The New Era of NFTs on DeSo | NFTz Explained](#)

A use case example by SharkGang

A social media platform that has the ability to create custom tokens and mint NFTs—who is building that? Turns out, it already exists.

Gone are the days when you needed to use dozens of incompatible apps spread across different blockchains and even many non-blockchain based applications to maintain your community and stay in touch with your fans.

Now, a creator can launch their own token, mint their NFTs, and build a thriving community using applications built on the DeSo blockchain. Since these applications all run on the same underlying blockchain infrastructure, they all share the same data. Seamlessly go from one app to the next and all of your data will already be there waiting for you.

What's more, since your data and assets are all integrated on the DeSo blockchain, this allows developers to more easily create applications whose features directly benefit your community. One example well known within the NFT space has to do with liquidity. Buyers of NFTs must wait sometimes months or even years to find another buyer once they decide to sell. However, using NFTz, sellers can now swap their NFTs for a project's token and then get instant liquidity by selling that token on Openfund.

Advanced NFT features

You will need \$NFTzTokens for these

- NFT Staking - reward your holders
- NFTz Batch - mint on demand with many options
- Flexible pricing - use any DeSo token
- Auctions with anti sniping

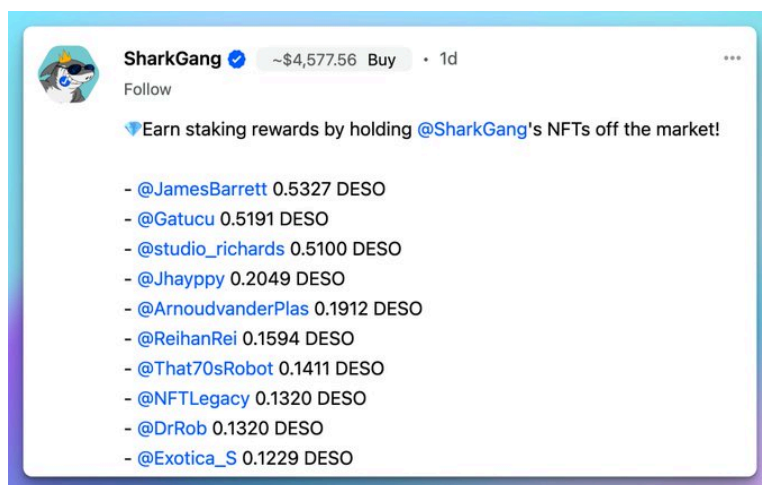

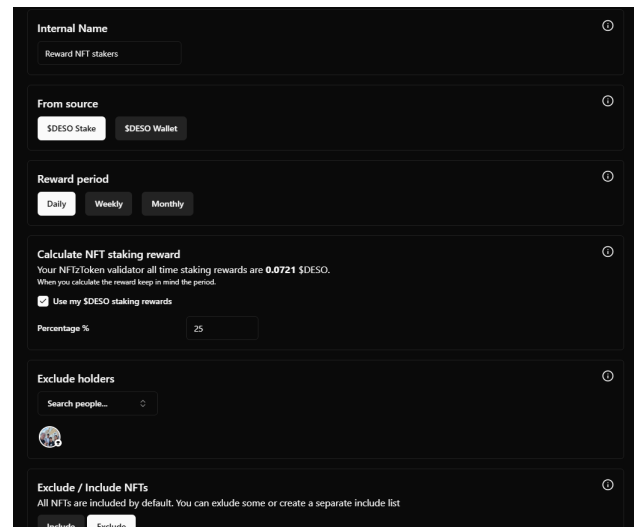

Below we'll explain each option in detail

NFT Staking

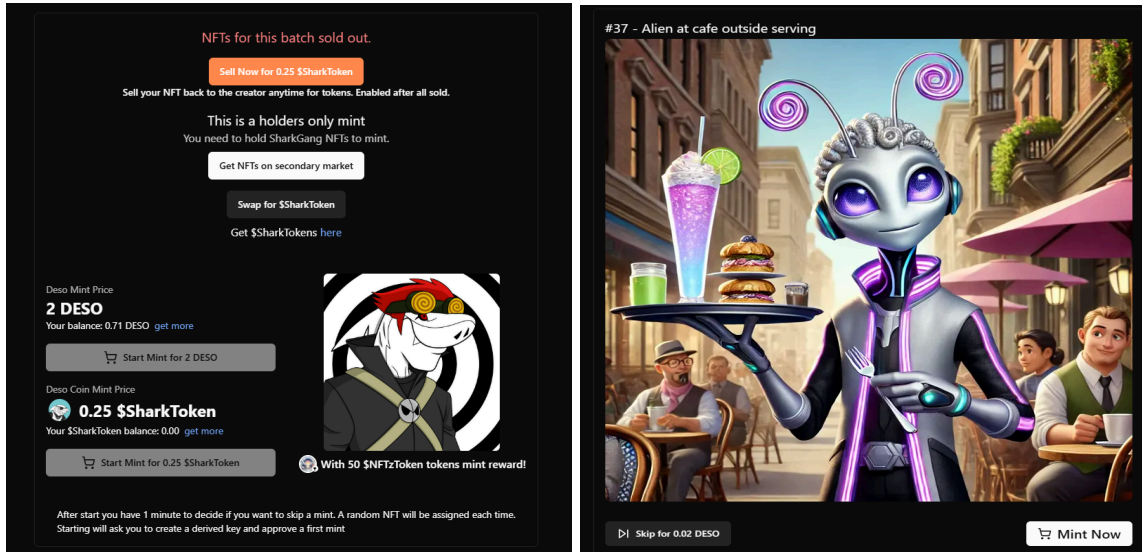

Use your staked \$Deso on NFTzToken validator or DeSo wallet to reward your holders on daily, weekly or monthly basis. We unstake the \$Deso and calculate a % you want to give from your DeSo rewards. You get 20% APY from deso so that “free” \$Deso is used to reward your holders making your NFT collection more attractive. We highlight NFTs with symbols if they have this advantage.

- Exclude or include lists for NFTs or Holders
- Automatically unstake or withdraw from your wallet
- A automated generated post with holders tagged and rewards given
- Run multiple programs for various collections
- NFTs with staking benefits will be listed [here](#)

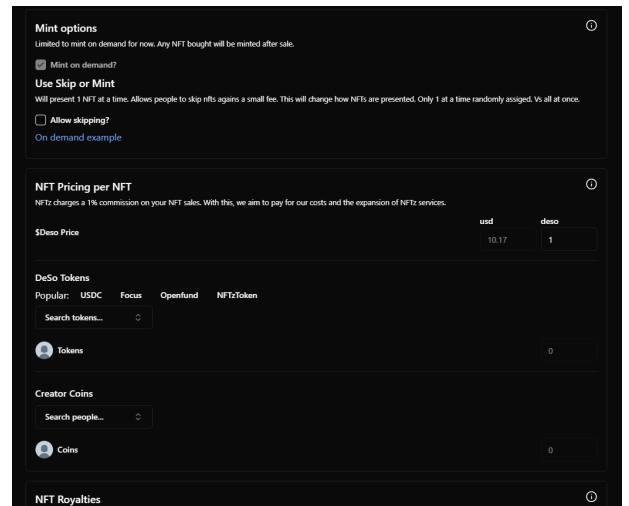

NFTz Batch

Add and create complete collections easily and fast to mint on demand and with flexible options such as flexible pricing, easy uploading, rewards and buy back.

- Fast uploading and easy editing
- Mint or skip or all at once
- Flexible pricing options, charge \$deso, tokens or coins
- Give rewards (tokens) for minting
- Enable a buyback program
- Full integration with NFTz collections
- Support DeSo royalties and NFT settings
- Optional gated access (holders only)
- Proven and performant
- Support and stats options

Batch Stats

Mints → Skips ↺ Buy Backs

Search on NFT id or Buyer publickey

Mint Sales 57

		0.2 \$DESO	#37	Feb 20, 2025, 9:31 AM			
		0.2 \$DESO	#37	Jan 30, 2025, 7:12 PM			
		0.1 \$mvanhalen	#37	Jan 30, 2025, 6:23 PM			
		0.2 \$DESO	#1	Jan 30, 2025, 4:59 PM			
		0.2 \$DESO	#37	Jan 30, 2025, 4:58 PM			

Flexible pricing

NFTz allows you to use more pricing options than just \$deso. You can charge in tokens or creator coins as well. And bidding in deso will also include an option to use focus to buy \$deso and bid on chain.

This allows you to have people buy your tokens first and get NFTs in return for instance. Or if you are in need for certain tokens you can set a price for those tokens

NFTs with alternative pricing will be listed [here](#)

The screenshot shows the NFTz website interface. At the top, there is a search bar with the text "Search" and "Ctrl K". Navigation tabs include "Home", "NFTs", "Posts", "People", and "Stats". The main content area displays a listing for "Faces of AI - E13" by "GlowArtAz". The listing features a digital artwork of a face with circuit patterns. Below the artwork, there are purchase options: "0.5 DESO" with a "Bid now" button, "1.25 DESO" with a "Buy now" button, and "\$focus" with a "Buy now" button. The interface also shows social interaction icons for comments, shares, likes, and views.

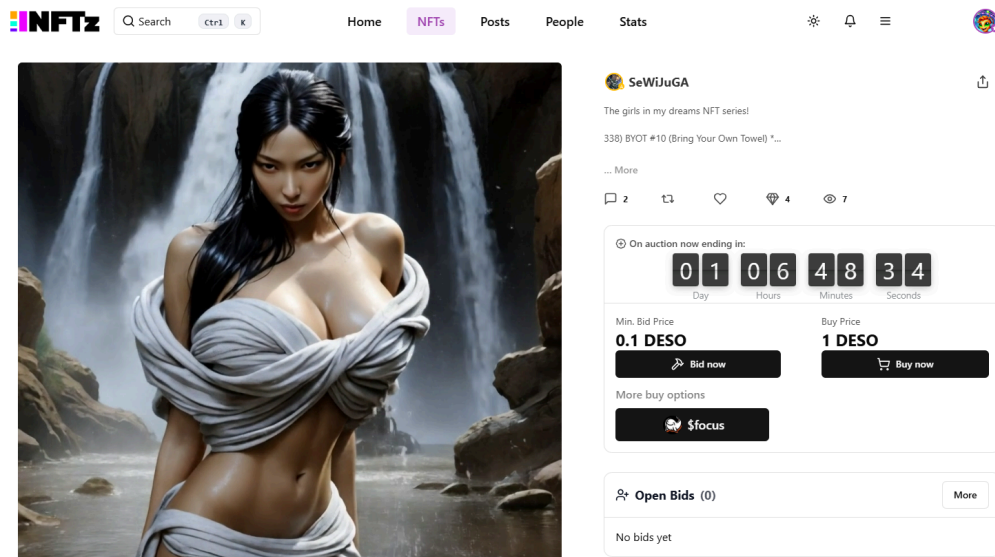

The screenshot shows a "Token buy options" modal window. It displays a payment option for "focus" tokens. The price is listed as "5000 tokens" and the user's "\$focus balance" is "9.95". There is a "get more" link and a "Pay 5000 \$focus" button.

The screenshot shows an "NFT Options" modal window for the NFT "06 - Alien in disco dancing". It indicates that the user owns 1 copy of this NFT. The modal includes tabs for "Sale", "Auction", "Claim", "Content", "Transfer", and "Burn". Below these tabs, there is a message: "Set alternative pricing for your NFT. This is optional. NFTz will take 1% commission for handling the transaction." The "Creator Coins" section has a search bar and a "Coins" count of 0. The "DeSo Tokens" section has a search bar and a "Tokens" count of 0. There is an "Add Pricing" button and a "Back" button.

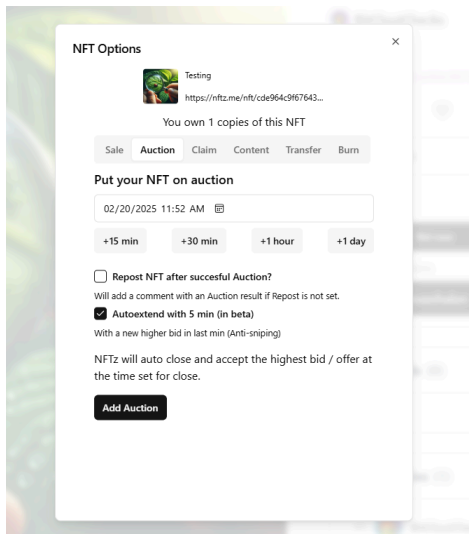

Auctions with Anti Sniping

Auctions can be used by all NFTz users, but popular items are in demand with many bids in the last seconds. With anti sniping an action will be extended with 5 minutes more if a new higher bid occurred in the last minute. And this gives other bidders a chance to increase their bid. Leading to a higher result for the creator and fair bidding practices.

All NFTs on auction are listed [here](#)

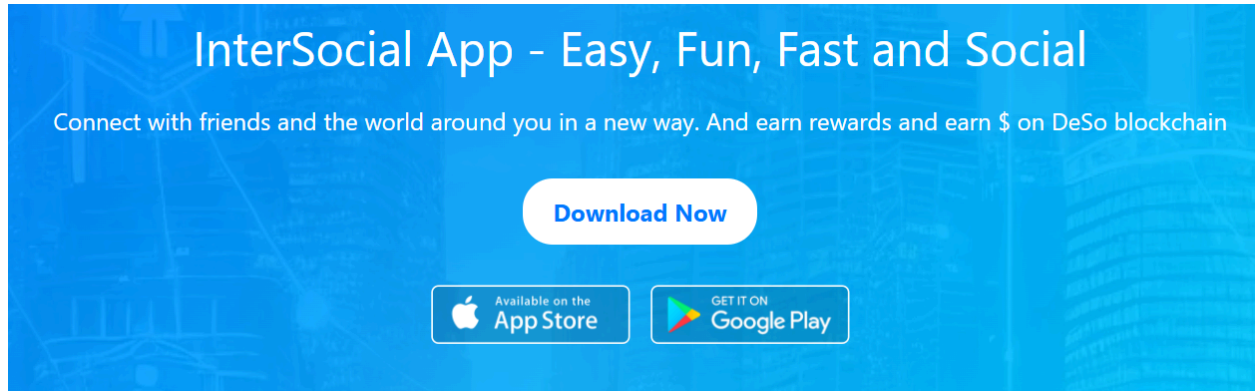

The screenshot shows the NFTz interface. On the left is a large image of a digital artwork depicting a woman in a white, draped garment standing in front of a waterfall. The right side of the page shows the auction details for the user 'SeWiJuGA'. The item is titled 'The girls in my dreams NFT series!' and is item #10 of the '338) BYOT #10 (Bring Your Own Towel) *...' series. The auction is currently ending, with a countdown timer showing 01:06:48:34 (1 day, 6 hours, 48 minutes, and 34 seconds). The minimum bid price is 0.1 DESO, and the current buy price is 1 DESO. There are buttons for 'Bid now', 'Buy now', and 'More buy options' (including \$focus). Below the auction details, it shows 'Open Bids (0)' and 'No bids yet'.

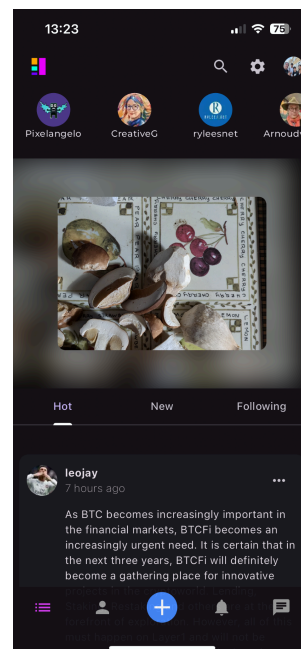

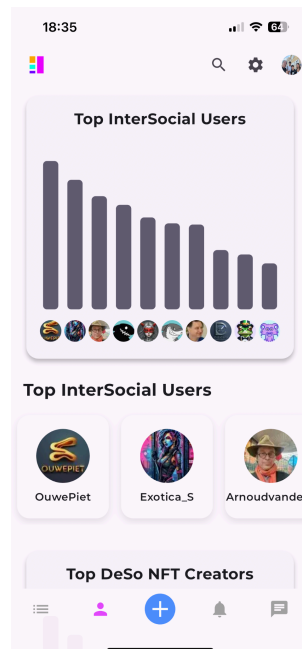

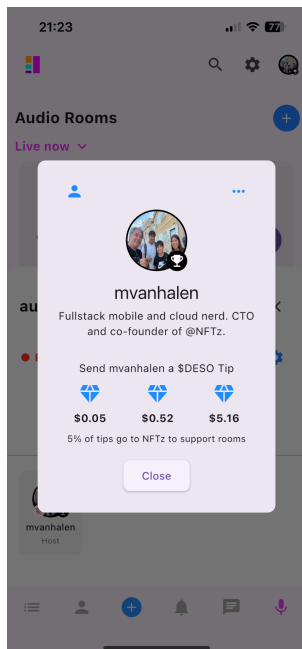

The screenshot shows the 'NFT Options' dialog box. It displays the user's profile 'Testing' and the URL 'https://nftz.me/nft/cde964c9f67643...'. It states 'You own 1 copies of this NFT'. There are tabs for 'Sale', 'Auction', 'Claim', 'Content', 'Transfer', and 'Burn'. Under 'Put your NFT on auction', the start time is set to '02/20/2025 11:52 AM'. There are buttons for '+15 min', '+30 min', '+1 hour', and '+1 day'. A checkbox for 'Repost NFT after successful Auction?' is unchecked. A checked checkbox for 'Autoextend with 5 min (in beta)' is present, with a note: 'With a new higher bid in last min (Anti-sniping)'. Below this, it says 'NFTz will auto close and accept the highest bid / offer at the time set for close.' At the bottom is an 'Add Auction' button.

InterSocial App

This mobile native app for Google and Apple is in the app stores. It's built for easy and fast social networking. Increasing the speed of conversation, making real time conversation possible through push notifications, direct messaging and audio rooms. With these options and when used in combination with NFTz marketplace it strengthens community and communication options. Making it possible not to miss a beat or NFT mint. You can get it [here](#)

- Easy and safe login via nftz.me
- Fast posting and commenting including tipping
- IPFS images and videos for higher quality
- Push Notifications for DeSo transactions
- Direct messaging with notifications
- Audio rooms with tipping (\$NFTzToken needed)
- Creator Alerts, get a notification when a creator makes a new post or NFT (\$NFTzToken needed)
- Get daily rewards using InterSocial

Tokenomics:

Feature	Details
Total Supply	10,000,000 tokens
Revenue Share	20% of platform revenue
Owner Lockup	Minimum 1 year
APY	15% for locked tokens
Trading Fee	21%
Buyback and Burn	5% of earned fees
\$Focus Rewards	Additional rewards in \$Focus
Minting new tokens	Disabled for stability

Benefits of Holding NFTzToken

Benefit Category	Details
Verification	Get verified on NFTz.me and InterSocial
Community	Part of vibrant community, access to SharkGang NFT drops
Earnings	15% APY, 20% revenue share, earn by using platforms, staking
Platform Features	Flexible NFT pricing, batch deploy, anti-sniping auctions
Engagement Tools	Creator alerts, DeSo rewards, audio rooms, tipping
NFT value and liquidity	Increase worth with staking, options like buyback and rewards

Roadmap

- Launch \$NFTzToken on Focus and Openfund trading
- DeSo rewards - set rewards for on chain events.
- NFT integration for InterSocial- auctions and buying / bidding
- Special NFT drops with SharkGang
- Joint DeSo approach of NFT collections and artists on other chains
- Work with community to keep improving
